2. In the spaces provided, respondents shall enter the company name and the year representing the last month and year covered in the report.
3. This schedule consists of 1 page.
4. If data are not available as to the location of all access lines by states, the returns may be made in accordance with the location of the central office toll center through which the calls originate.
5. The numbers shown may be based on an actual count taken periodically during the year. Describe in a note the general characteristics of the methods employed in arriving at the numbers shown.
6. As used in the schedule, a "local call" means one between points both of which are within the local service area of the calling telephone, and a "toll call" means one to a point outside of the local service area of the calling telephone. Interlata toll calls are comprised of calls directed to interexchange carriers. Interlata toll calls are toll call handled by a local operating company within a given LATA. The number of toll calls should be based upon originating message volumes.
7. Include any Intralata-Interstate toll calls in column (c).
8. Billed minutes should be based on bills sent to customers. For calls where this data is unavailable, a statistically valid calculation may be made.
9. In column (d), the number of interstate toll calls includes outward calls, 800 service, directory service and dial-it service.
10. In column (f), the number of intrastate toll calls includes outward calls, 800 service, directory service, dial-it service, and optional calling plans.
